MIGLIORARE LA QUALITÀ E EVITARE GLI ECCESSI IN RIABILITAZIONE MUSCOLOSCHETRICA

“OVERCOMING OVERUSE SERIES”

A JOSPT Series 2020-2021

- Part 1: Improving Musculoskeletal Health Care
- Part 2: Defining and Quantifying Health Care Overuse for Musculoskeletal Conditions
- Part 3: Mapping the Drivers of Overuse in Musculoskeletal Health Care
- Part 4: Small Business Survival
- Part 5: Is Shared Decision Making Our Excalibur?

“Overuse is the use of services that are unlikely to improve patient outcomes, result in more harm than benefit, and would not be desired by an informed patient. The Overcoming Overuse series explores the myriad ways diagnostic tests and treatments are overused in musculoskeletal health care and proposes ways to ensure patients receive appropriate care. We focus on strategies to promote guideline-concordant care in rehabilitation practice and strategies to overcome overuse”
